Maths is a vital part of everyday life. It is an important creative discipline that helps us to understand and change the world. It teaches our children how to make sense of the world around them and develops their ability to understand and solve problems, Numbers are one way that we communicate between ourselves about our world and therefore: we need to understand what numbers represent and how they are used in order to better understand our world.

At Tame Valley Academy, we intend to give every child the capability, confidence and resilience to reach their full potential by ensuring that they have the tools to calculate fluently, reason logically, problem solve and think in abstract ways. For this reason, we follow the White Rose Maths structure and make additions and support this using NECTM and NRICH. Our maths lessons are taught daily and follow a mastery approach which is split into arithmetic, fluency and knowledge (AFK) where children acquire the deepened understanding of skills and concepts through concrete, pictorial and abstract concepts. Children then apply these maths skill to Reasoning and Problem Solving (RPS) part of the lesson where children reasoning in the real world. We believe this is all important for our children's mathematical development.

Our whole curriculum is shaped by our school vision which aims to enable all children, regardless of background, ability or SEND, to flourish and become the very best version of themselves they can possibly be. We teach the National Curriculum, supported by a clear skills and knowledge progression. This ensures that skills and knowledge are built on year by year and sequenced appropriately to maximise learning for all children.

Our aim is to support children to:

- become capable, confident and independent mathematicians.
- develop a deep conceptual understanding of Maths and its interrelated content so that children can apply their learning in different situations.
- articulate, discuss and explain their thinking using appropriate mathematical vocabulary.
- see mistakes as a learning opportunity.
- develop into resilient and inquisitive learners.

## EYFS (Nursery \& Reception)

| Addition | Subtraction | Multiplication | Division |
| :---: | :---: | :---: | :---: |
| Children are encouraged to gain a sense of the number system through the use of counting concrete objects. <br> They combine objects in practical ways and count all. <br> They understand addition as counting on and will count on in ones and twos using objects, cubes, bead string and number line. <br> They use concrete and pictorial representation to record their calculations. <br> They begin to use + and = <br> They are encouraged to develop a mental picture of the number system in their heads to use for calculations. <br> Higher attaining children may be able to represent their calculations using symbols and numbers within a written calculation. | Children are encouraged to gain a sense of the number system through the use of counting concrete objects. <br> They understand subtraction as counting out. <br> They begin to count back in ones and twos using objects, cubes, bead string and number line. <br> They use concrete and pictorial representation to record their calculations. <br> They begin to use - and = <br> They are encouraged to develop a mental picture of the number system in their heads to use for calculations. | Children use concrete objects to make and count equal groups of objects. <br> They will count on in twos using a bead string and number line. <br> They understand doubling as repeated addition. $2+2=4$ <br> They use concrete and pictorial representation to record their calculations. <br> Higher attaining children may be able to represent their calculations using symbols and numbers within a written calculation. | Children use concrete objects to count and share equally into 2 groups. <br> 6 cakes shared between 2 people each person gets 3 cakes. $6 \div 2=3$ <br> They count a set of objects and halve them by making two equal groups. <br> They understand sharing and halving as dividing by 2 . <br> They will begin to use objects to make groups of 2 from a given amount. <br> They use concrete and pictorial representation to record their calculations. <br> Higher attaining children may be able to represent their calculations using symbols and |

g
$e$

1 \& \begin{tabular}{l}
Division with no remainders through sharing. <br>
Use concrete materials to share into groups.

 \& 

Consolidate learning from KS1 using diagrams of sharing and repeated subtraction and addition on a number line to make jumps
Example without remainder.

$$
40 \div 5
$$ <br>

Ask "How many 5 s in 40?" <br>
Concrete methods could be represented pictorially within books to show understanding.

 \& 

How many groups of 6 in 24?

$$
24 \div 6=4
$$ <br>

Abstract methods may be supported with pictorial methods within the children's books.
\end{tabular} <br>

\hline
\end{tabular}

## Division with remainder through sharing <br> $14 \div 3=$ <br> 

Divide objects between groups and see how much is left over.

E

Division no remainders - introduction to bus stop method Use place value equipment on a
place
value grid alongside short $4 \longdiv { 4 8 }$ division.

The model uses grouping.

Students can continue to use drawn diagrams with circles to help them divide numbers into equal groups. Remainders will be seen by not fitting into a whole group

Draw dots and group them to divide an amount and clearly show a remainder.
Example without remainder $0 \div 5$ Example with remainder
5+5+5+5+5+5+5+5}=8\mathrm{ five
5+5+5+5+5+5+5+5}=8\mathrm{ five
0}
0} $38 \div 6$
+6+6+6+2 06121824303638

Children will begin to move onto division with remainders. A number sentence will support any abstract written calculation by using pictorial method to support.

```
    29\div8=3 REMAINDER 5
    \uparrow \uparrow \uparrow }
dividend divisor quotient
remainder
```

## Short division

Children will begin to use the formal written method of division without remainders. This will only come after a clear concept is understood using manipulatives.

Dividing by $2,3,4$, and 5

## DIVISION - Upper KS2 (Years 5 \& 6)

|  | Concrete | Pictorial | Abstract |
| :---: | :---: | :---: | :---: |
|  | Dividing whole numbers by 10,100 and 1,000 <br> Use place value equipment to support unitising for division. $4,000 \div 1,000$ <br> 4,000 is 4 thousands. $4 \times 1,000=4,000$ <br> So, $4,000 \div 1,000=4$ <br> Concrete and pictorial representations may still be required to support the formal method of division (Bus Stop) - Go back to LKS2 to consolidate learning. | Understand how and why the digits change on a place value grid when dividing by 10,100 or 1,000 . $3,200 \div 100=?$ <br> 3,200 is 3 thousands and 2 hundreds. $\begin{aligned} & 200 \div 100=2 \\ & 3,000 \div 100=30 \\ & 3,200 \div 100=32 \end{aligned}$ <br> So, the digits will move two places to the right. <br> Continue to use blank number lines as appropriate, using multiples of the divisor. $65 \div 5=13$ | Chunking $73 \div 5$ <br> 5 $\begin{array}{ll} \begin{array}{\|c} 73 \\ -\frac{50}{23} \end{array} & (\underline{10} \times 5) \\ \frac{-20}{3} & (\underline{4} \times 5) \end{array} \quad 10+4=14$ <br> How many 5 s have been subtracted? 14 sets of 5 , with 3 left over. <br> Answer: $73 \div 5=14 \mathrm{r} 3$ <br> Chunking is repeated subtraction of the divisor and multiples of the divisor. <br> Bus Stop Method for division <br> Begin with divisions that divide equally with no remainder. <br> Move onto divisions with a remainder. |

Dividing decimals by 10,100 and 1,000
Use place value counters to represent dividing by $10,100,1000$.
Represent division using exchange on a place value grid.

Represent division to show the relationship with multiplication Understand the effect of dividing by 10,100 and 1,000 on the digits on a place value grid.

$0.85 \div 10=0.085$

$8.5 \div 100=0.085$

## Finally move into decimal places to divide the

 total accurately using a formal method for division (Bus stop)

| 1. Divide. | 2. Multiply \& subtract. | 3. Drop down the next digit. |
| :---: | :---: | :---: |
| $\begin{gathered} { }^{10} \\ 2 \longdiv { 2 } \\ 2 \longdiv { 5 8 } \end{gathered}$ <br> Two goes into 5 two times, or 5 tens $\div 2=2$ whole tens -- but there is a remainder! | $\begin{gathered} t 0 \\ 2 \\ 2 \longdiv { 5 8 } \\ \frac{-4}{1} \end{gathered}$ <br> To find it, multiply $2 \times 2=4$, write that 4 under the five, and subtract to find the remainder of 1 ten. | $\begin{array}{r} t \circ \\ 29 \\ 2 \longdiv { 5 8 } \\ -41 \\ \hline 18 \end{array}$ <br> Next, drop down the 8 of the ones next to the leftover 1 ten. You combine the remainder ten with 8 ones, and get 18. |
